

INPACT MANAGER

JOB DESCRIPTION

About INNODIA

INNODIA is an international non-profit organization established in Belgium in July 2022, emerging from a successful European public-private partnership. Our mission is to accelerate the development of disease-modifying therapies for people living with Type 1 diabetes. Through our unique business model, we bridge the gap between academic research and industry by offering specialized services to medicine developers focused on disease modifying therapies and our academic network of excellence.

Our approach is centered on four key pillars:

1. **A European Network of Clinical Trial Sites:** verified and supported by INNODIA, these sites are equipped to conduct fast and efficient intervention clinical trials across all stages of Type 1 diabetes or actively contribute as referral partners.
2. **INPACT (Innodia People living with Type 1Diabetes CommuniTy):** a large and engaged community of people living with Type 1Diabetes, trained and empowered to contribute meaningfully to drug development.
3. **Global Experts and Expertise:** a network of world-renowned experts and cutting technologies that we connect with medicine developers to accelerate therapeutic innovation.
4. **Data and Sample Repository:** access to a growing data lake, including clinical and research data, and biological samples, that can be used to optimize research and clinical outcomes.

With these assets, INNODIA is uniquely positioned to advance Type 1 diabetes research and accelerate the development of life-changing therapies.

INPACT Manager

INNODIA is seeking a highly motivated **INPACT Manager** to play a pivotal role in ensuring that the community of people living with T1D that we are building is highly valued and influential. This individual will be responsible for driving the business development strategy for the community, creating engaging programs for community members, and developing services tailored to the needs of our clients, primarily medicine developers. This is a unique opportunity to be part of an organization at the forefront of transforming patient engagement in clinical research.

Key Responsibilities:

- Develop and implement business strategies to train and nurture the patient expert group within INNODIA.
- Design and develop digital and in person training programs for INPACT Candidates and Associates.
- Design and manage patient-centric programs that provide valuable input to clinical research and development activities.
- Build and maintain strong relationships with medicine developers, understanding their needs and aligning INNODIA patient services accordingly.
- Collaborate closely with scientific and clinical teams to ensure the integration of patient insights in ongoing projects.
- Create engaging communication materials for a variety of stakeholders, including patients, clinicians, and industry partners.

- Ensure patient programs are impactful, sustainable, and aligned with **INNODIA**'s overall mission and goals.

Ideal Candidate Profile and Key Skills

- Advanced degree in Life Sciences, Medicine, or a related field.
- Strong understanding of the clinical research environment.
- Proven experience in program development and project management.
- Excellent verbal and written communication skills in English, with the ability to engage and inspire diverse audiences.
- Creative thinker with a strategic mindset, capable of translating ideas into actionable plans.
- Autonomous, proactive, and willing to take initiative in a dynamic and evolving environment.
- Previous experience working with patient communities is a plus.
- Well-developed computer skills in database management, MS Word, Excel, CRM and web-based research

Position Details:

- Location: remote work (within CEST time zones)
- Status: consultant contract
- Hours: full-time commitment
- Salary: commensurate with experience
- Reports to: **INNODIA** Managing Director
- Works closely with: **INNODIA** Managing Team
